# 2. Case Module Dashboard

The Case dashboard provides an overview and statistics of all the Cases generated in the module. Below are the details displayed on the Case dashboard.

1. **Widget:** Different status and the number of cases against the statuses in the module.
2. **Case summary:** It shows the number of cases that are in active status, number of cases that are rejected, number of Cases for which the Response / resolution SLA are breached.
3. **Cases drop down:** It has 2 options. I.e., My Cases and other Cases. User can view the list of Cases based on the type they select.
4. **Search:** To provide flexibility to search specific Case with the key word.
5. **Filter:** To add filter condition. Based on the filter condition that the User defines, Cases will be displayed.
6. **Export icon:** To export the list of Cases displayed on the dashboard.
7. **3 Dots icon:** To customize the table view.
8. **List view:** To view the list of Cases created. All Cases are displayed in the dynamic table.
